

# Prinq RIP Software

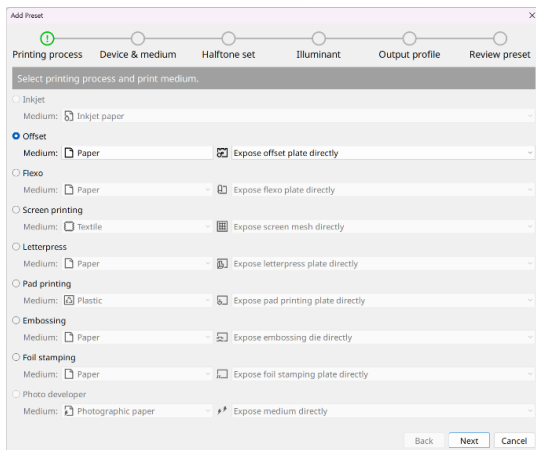

Fast and easy to use RIP

## Purpose

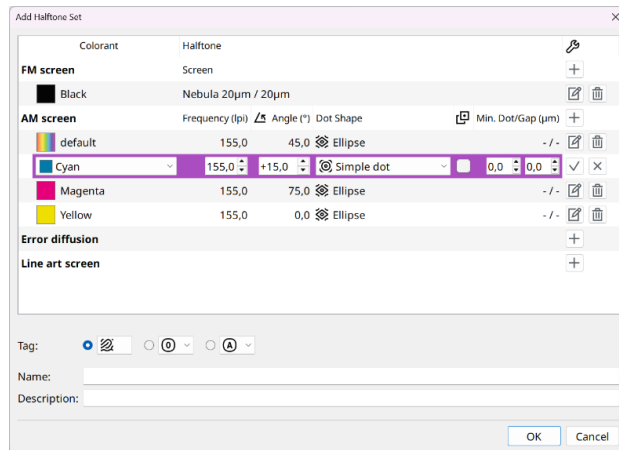

The Prescape Prinq RIP streamlines your workflow by quickly ripping PDF and (E)PS files to 1-bit TIFF files for your imagesetter. With intuitive preset configuration and hot folder support, it effectively automates repetitive tasks to save you time and effort.

## Main functions

With built-in support for Lüscher imagesetters, Prinq RIP simplifies the creation of presets for your workflows. It also provides a wide range of AM, FM, AM/FM-hybrid and line art screening options to accommodate your production needs.

User interface for adding a preset

User interface for adding a halftone set

## Main benefits

- Fast ripping to high resolution 1-bit TIFF files
- Easy and intuitive user interface with built-in support for Lüscher imagesetters
- Extensive halftoning options
- Spot-on colors with 16-bit accuracy
- Automatic processing using hot folders
- Easy creation and editing of measurement-based linearizations
