

X!Len2Tiff Software

Direct support for .len files

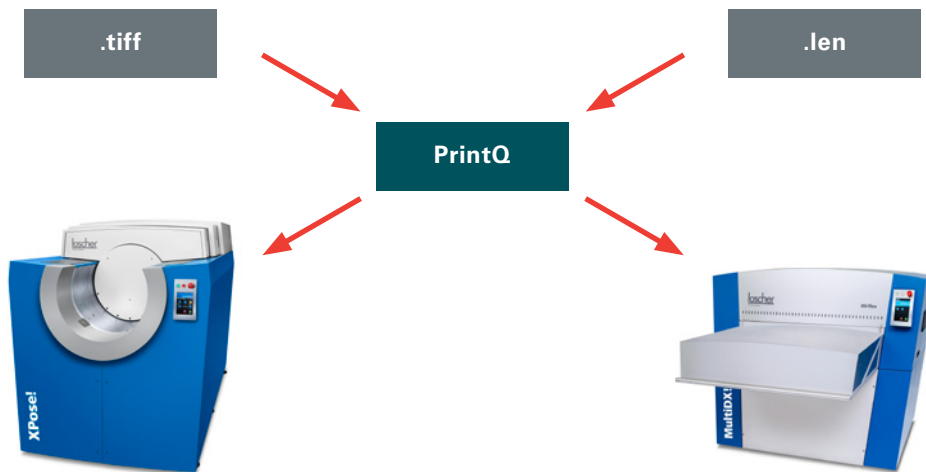

Purpose

Simplified use of .len data.

Main functions

With this option, bitmap exposure data with the extension .len can be read and exposed directly by PrintQ. Since these data can be processed directly, there is no need to convert them beforehand, which saves valuable processing time.

The .len data can also be visualized directly in X!Preview.

Main benefits

- No data conversion necessary
- No extra processing time
- No need for a separate conversion tool
